Apologies...I forgot to change the date range... this email applies to 1/25 - 1/29

[Nonresponsive based on revised scope] will be giving you the thumb drive again this morning with the dust trak data for 1/25, which is the only day that we collected particulate data due to weather conditions.

Also, segments that were mixed this week include 12-1, mixed on Monday 1/25, and 12-6, mixed on Wednesday 1/27

[Nonresponsive based on revised scope]

Please review your message below. Are these numbers for 1/18-22 or 1/25-29?

Also the USB did not contain dust trak data for last week. Did we run the dust trak at all last week?

Can you also include segments mixed last week ( no need to include segments moved)

Thank you
Chris

Chris

The following are the numbers for this week (1/18 – 1/22):

A total of 5,034.37 tons of PCB material removed from site (total as of 1/29)

11 new trucks sent out this week (5 from property 1; 6 from property 2)

Total number of radiation items to date: 639

No radiation items located this week.

Thanks
